

Movement Anti-Reset

*We believe that the best way to economic development - now - is not to reset or restart and we don't agree with the 'new normal' idea. The wealthy concept to immediate future to us is to **respin**. A deep rewiring of the social and economic tissue. Some collaborative effort to reinvent the economic, financial, social, political, educational and the business web is required. The return of human factor and natural intelligence. People - not systems - at the center of every thing's life with natural - more than artificial - intelligence in charge.*

**Movement
Anti-Reset**

How to translate our positioning

*Building the adapted concept of deep rewiring - **respin** - linking the areas that involve the development of the social tissue "thread to thread".*

Conceptualizing Anti-Reset as an intelligent movement / posture that generates economic and financial benefits for everyone involved with the thought and vision of "it is not true that things are out of control!"

*We believe that the best way to economic development - now - is not to reset or restart and we don't agree with the 'new normal' idea. The wealthy concept to immediate future to us is to **respin**. A deep rewiring of the social and economic tissue. Some collaborative effort to reinvent the economic, financial, social, political, educational and the business web is required. The return of human factor and natural intelligence. People - not systems - at the center of every thing's life with natural - more than artificial - intelligence in charge.*

Fixing it on everyone's mind

Rewiring? The ability to **respin** an economic, financial, political, social and environmental tissue, frayed in the real web; without neglected people and the health of their relationship with them, replacing essential connecting threads in their places, without allowing the real web tissue to break.

Why anti-reset? Breaking (resetting) the real web tissue does not change people, does not change the economy, does not change realities and soon becomes more of the same.

*We believe that the best way to economic development - now - is not to reset or restart and we don't agree with the 'new normal' idea. The wealthy concept to immediate future to us is to **respin**. A deep rewiring of the social and economic tissue. Some collaborative effort to reinvent the economic, financial, social, political, educational and the business web is required. The return of human factor and natural intelligence. People - not systems - at the center of every thing's life with natural - more than artificial - intelligence in charge.*

Our target

Decision makers!

People who make decisions that impact the lives of a large number of citizens.

People who make decisions that change people lives and the economy.

People who have the power to govern key processes.

*We believe that the best way to economic development - now - is not to reset or restart and we don't agree with the 'new normal' idea. The wealthy concept to immediate future to us is to **respin**. A deep rewiring of the social and economic tissue. Some collaborative effort to reinvent the economic, financial, social, political, educational and the business web is required. The return of human factor and natural intelligence. People - not systems - at the center of every thing's life with natural - more than artificial - intelligence in charge.*

The Formula of Things

The main Webinar

Lorenzo Carrasco – México / Brazil

Lucas Blanco - Brazil

Joicy Britts - Brazil
